

# GEOVISION SEMINAR

February 13th, 2009

2009 V.8.3  
Training  
Seminar

## **We'll prepare you for the IP era!** NVR, Video Analytics and IP Integration

By GeoVision/USA Vision Systems Inc.

Since 2007, IP surveillance has been the hottest topic for this industry. And since early 2008, we're starting to see real projects deploying IP cameras with NVR servers. This seminar is aimed to help you understand and feel confident about IP integration. We're also going to demonstrate the new and exciting features in V8.3.

Below is our outline for this training seminar:

1. IP Integration
  - a. Hardware required for a successful installation
  - b. Software for viewing, recording, playback and video analytics
2. V8.3 features
  - a. 32 ch. DVR/NVR/Hybrid DVR
  - b. Digital Matrix
3. Geographic Information System
  - a. GPS tracking with video for school bus, truck fleet
  - b. Commercial vs Government type projects
4. License Plate Recognition
5. Central Monitoring with IP surveillance
6. POS integration for the Retail Industry
7. Access Control with IP cameras
